ABOUT PARKER LABORATORIES, INC.

Parker Laboratories, certified to 13485:2003, is the first manufacturer of electromedical contact media to have earned this international recognition of excellence. Parker is registered with the U.S. Food and Drug Administration as a manufacturer of medical devices and all our products are produced under Good Manufacturing Practices (GMP) directives. Parker products are available in every country throughout the world and medical practitioners everywhere recognize Parker for quality and dependability.

PARKER LABORATORIES DEDICATED TO QUALITY

Parker Laboratories is the recognized world leader in the manufacture and marketing of accessories and supplies for the ultrasound and electromedical markets.

We serve our customers by consistently providing products that meet or exceed industry standards and customer expectations.

We create customer confidence through prompt, efficient service and provide effective solutions to our customers' problems, thereby gaining and holding their respect and loyalty.

Parker Laboratories, Inc. was established in 1958. Since then, we have earned a pre-eminent position in the healthcare industry by developing medical ultrasound and electromedical contact media. Parker is a family-owned business that has built its reputation by a resolve to develop high quality products that respond to our customers' needs in an ever-changing industry.

Today, healthcare professionals worldwide recognize Parker products. We are the industry leader in the production and distribution of gels, solid gels, lotions and pads. The work of our Research and Development Group ensures that new product development will always meet the demands of health care technology. Parker products are recommended by leading manufacturers of electromedical equipment throughout the world.

We recognize, however, that the quality of our products is only as good as our willingness to do what it takes to guarantee that our customers are satisfied. Whether in the timely delivery of our products or working with our customers to determine their most effective usage, our goal is to guarantee our products perform at an optimum level.

We are looking toward the future and are happy to report that our continued success has enabled us to move into a new state-of-the-art facility. It is approximately four times larger than our previous one and increases our capability to provide the highest quality products and services.

As we begin a new millennium, we are well prepared to reach new milestones of product development and services for our customers in the years to come.

Sincerely,

Neal Buchalter,
President

Ultrasound Products
